EMA/CHMP/ICH/405290/2010

ICH guideline Q4B annex 13 to note for evaluation and recommendation of pharmacopoeial texts for use in the ICH regions on bulk density and tapped density of powders – general chapter

Step 5

Transmission to CHMP	September 2010
Adoption by CHMP for release for consultation	September 2010
End of consultation (deadline for comments)	December 2010
Final adoption by CHMP	July 2012
Date for coming into effect	January 2013

Q4B annex 13 to note for evaluation and recommendation of pharmacopoeial texts for use in the ICH regions on bulk density and tapped density of powders – general chapter

Table of contents

1. Introduction

This annex is the result of the Q4B process for the Bulk Density and Tapped Density of Powders General Chapter.

The proposed texts were submitted by the Pharmacopoeial Discussion Group (PDG).

2. Q4B outcome

2.1. Analytical procedures

The ICH Steering Committee, based on the evaluation by the Q4B Expert Working Group (EWG), recommends that the analytical procedures described in the official pharmacopoeial texts, Ph.Eur. 2.9.34. Bulk Density and Tapped Density of Powders, JP 3.01 Determination of Bulk and Tapped Densities, and USP General Chapter <616> Bulk Density and Tapped Density of Powders, can be used as interchangeable in the ICH regions.

2.2. Acceptance criteria

The texts evaluated did not contain acceptance criteria.

3. Timing of annex implementation

When this annex is implemented (incorporated into the regulatory process at ICH Step 5) in a region, it can be used in that region. Timing might differ for each region.

4. Considerations for implementation

4.1. General consideration

When sponsors or manufacturers change their existing methods to the implemented Q4B-evaluated pharmacopoeial texts that are referenced in Section 2.1 of this annex, any change notification, variation, and/or prior approval procedures should be handled in accordance with established regional regulatory mechanisms pertaining to compendial changes.

4.2. FDA consideration

Based on the recommendation above, and with reference to the conditions set forth in this annex, the pharmacopoeial texts referenced in Section 2.1 of this annex can be considered interchangeable. However, FDA might request that a company demonstrate that the chosen method is acceptable and suitable for a specific material or product, irrespective of the origin of the method.

4.3. EU consideration

For the European Union, regulatory authorities can accept the reference in a marketing authorisation application, renewal or variation application citing the use of the corresponding text from another pharmacopoeia as referenced in Section 2.1, in accordance with the conditions set out in this annex, as fulfilling the requirements for compliance with the Ph. Eur. Chapter 2.9.34. on the basis of the declaration of interchangeability made above.

4.4. MHLW consideration

The pharmacopoeial texts referenced in Section 2.1 of this annex can be used as interchangeable in accordance with the conditions set out in this annex. Details of implementation requirements will be provided in the notification by MHLW when this annex is implemented.

4.5. Health Canada consideration

In Canada any of the texts cited in Section 2.1 of this annex and used in accordance with the conditions set out in this annex can be considered interchangeable.

5. References used for the Q4B evaluation

5.1 The PDG Stage 5B sign-off document (Rev. 1 – Corr. 1): Japanese Pharmacopoeial Forum,Volume 18, number 3 (September 2009).

5.2 The pharmacopoeial references for the Bulk Density and Tapped Density of Powders General Chapter for this annex are:

5.2.1 European Pharmacopoeia (Ph. Eur.):

Supplement 6.8 to Ph.Eur. 6th Edition (official July 2010), Bulk Density and Tapped Density of Powders (reference 07/2010:20934).

5.2.2 Japanese Pharmacopoeia (JP):

3.01 Determination of Bulk and Tapped Densities as it appears in the JP Sixteenth Edition (March 24, 2011, The Ministry of Health, Labour and Welfare Ministerial Notification No. 65).

5.2.3 United States Pharmacopeia (USP):

<616> Bulk Density and Tapped Density of Powders, USP 34, 2nd Supplement official December 1, 2011).
